

H₂O

Concrete Finish POXY®

Very Low VOC (27gm/kg)

H₂O POXY is a 62% solids, high build, water-borne, semi-gloss, epoxy coating with high abrasion resistance. H₂O POXY is specifically designed for concrete surfaces where durability is a must such as car parks, warehousing and factory floors. Delivering finishes and performance previously not achievable with water-borne epoxy systems.

UNIQUE FEATURES

- Low VOC
- 62% Solids
- Touch dry 3-4 Hours
- Easy to Re-coat
- Wash up in water
- Excellent adhesion
- Low preparation requirement
- Green Star compliant 
- Suitable for high traffic areas
- Can be used on damp surfaces
- High build @ 90 microns per coat (1Lt per 6.5m²)
- Low temperature curing down to 4° deg C (ambient)
